Every Child Should Be Given This Tonic

When children have no appetite; when they are continually peevish and irritable; when they are restless in their sleep, it is almost a certain indication that their digestive organs are troubled with worms or other parasites. This is a very common ailment and easily remedied. Physicians will tell you that nearly every child is so troubled at some time and, in fact, many adults suffer in the same way. Among adults this trouble is invariably referred to as indigestion, when in reality it is due to a small parasite which infests the intestinal tract.

small parasite which infests the intestinal tract.

For children, Jayne's Tonic Vermifuge is unsurpassed, as it is not only destructive to these parasites, but completely removes the nests in which their young are deposited. Seldom does it purge, and the improvement in the health of the child will be the first and best indication of the beneficial results of the medicine. Not only will the Vermifuge destroy all the parasites, but its wonderful tonic effects will restore the digestion which has been impaired.

For children, the addition of a little sugar will make it so palatable that they will take it readily. Millions of parents have preised it for more than eighty years. Insist on Jayne's, accept no other. Sold by druggists everywhere. Dr. D. Jayne & Son, Philadelphia, Pa.

Peculiar Island Formations. The Maldive archipelago, lying in the Indian ocean, several hundred miles southwest of the southern point of Hindustan, is inhabited, but it rarely sees visitors from the civilized world. These islands, all composed of coral rock, are no fewer than fourteer thousand in number. Few of there rise more than seven or eight feet above the sea level, although they contain cocoanut palms and oth er forms of vegetation. Hundreds and hundreds of little islands, ranged around in a circle, with narrow and shallow channels between, form atolls or rings, having quiet waters within. Occasionally, in this unique group, an individual island is found in the form of a ring with a smooth lake inclosed m its coral embrace.

Just a Little Farther On. After North Carolina voted to be a state its citizens becar suspicious of strangers.

One day a commercial traveler went up to an old negro in a little town in purpose from wherever they could and the eastern part of the state and said introduced it in a most fantastic man-"Say, uncie, if you will lead me to

some place where I can get a drink, working on their track near by the I'll give you two dollars.' The old darky looked him over care

fully, accepted the two plunks, and "All right, boss; jest foller me." He led the thirsty one through the town, on through the suburbs, into the country, and then started due west. After they had traversed about five miles in silence and still nothing in sight, the man asked: "Look here, Mose! Where are we going after this drink?"

"We's gwine ovah into Kentucky, boss; we can't git nuthin in dis state."-Judge.

EUROPEAN POWERS FIND THE BALKAN SITUATION HARD TO BOLVE

RUMORS OF A NEW TROUBLE

s Soon as Peace Has Been Signed by Allies and Turks a Fresh War May Commence Between Greece, Bulgaria and Servia.

London.—There is no cause for pesimism even now. This was the only official utterance that could be obtained regarding the result of the momentous conference of ambassadors of the powers on the Balkan situation Monday.

The conference lasted more than hree hours and another arranged for the near future indicates that the diplomats still expect to find a peaceful solution of the problem caused by Montenegro's defiance of the powers.

The mystery surrounding events in the Balkans is becoming deepened. No further news has been received of Essad Pasha's movements in Albania, and the situation in Salonika is difficult to understand. A message from Salonika confirms the report that orders were given to evaculate all places occupied by the Greeks, but that later orders were countermanded and attempts were made to deny they were

The previous dispatch, dated April 20, to the Daily Telegraph, expresses the firm conviction that immediately peace is signed between the allies and Turkey a new war will commence between Servia, Bulgaria and Greece.

A Bulgarian correspondent says that large concentration of opposing troops is in readiness for these new campaigns, and adds that he has heard from reliable sources that considerable fighting has already occurred and that three important engagements were fought in the last week concerning which the greatest' secrecy has been maintained.

SUIT BEGUN FOR \$2,500,000.

Sum Used in Promoting Chicago Elevated Merger.

Chicago.-Charges that a \$2,500,000 ee, by which the Chicago elevated railroads were merged in 1911, was appropriated by Henry A. Blair, chair nan of the board of directors of the Chicago Railways company, were conained in a suit filed by J. B. Hogarth formerly auditor of the Chicago City Railway company and later general young fellows, born last April, who in superintendent of the Chicago Railways company. Hogarth seeks in his suit to force the payment of \$2,500,000 as his share of the promotional fees for work on the merger.

The National City bank, the Chicago Elevated railway's collateral trust the Chicago Railways company, the Commonwealth Edison company Frank A. Vanderlip, Samuel McRob erts, Samuel Insull and Ira M. Cobb also are made defendants in the suit

Friedmann's Plan.

New York.—It was announced at the apartments of Dr. Frederich Franz Freidmann that he had signed a contract for the disposition of his tuberculosis vaccine by a company through institutes to be established in every state. The contract, it is said, provides for the free treatment of the poor in all localities. No details of the financial end of the contract were nade public.

Aviator is Killed.

GRICHTEULE EFFERT OF WAR Vhat a General Embrolling of th

European Powers Would Mean to the Nations Involved.

M. Jules Roche, former minister of commerce of France, has made some emarkable calculations as to the cost of an European war. Taking as a bais the expenses incurred by France during the war of 1870, he reckons that, assuming, for the sake of exam ple, that the six nations of the triple alliance and the triple entente wen to war, the cost of maintaining the armies alone would work out at no ess than \$5,400,000,000 a month, without taking into account the other expenses. Continuing in the Gaulois, he

"And what would be their internal condition? The belligerent nations would be struck with general paralysis and would see their very means subsistence disappear. Suspension of work would be forced even on hose who were not included in the general mobilization, since whom would there be to work for? To whom would they sell their products? How could they be exchanged or transported? All the large works and factories, where the division of labor is completed, would have to be shut, Even agriculture would be impossible.

"No more purchases or sales; either the economic or the financial death of labor, an abrupt stoppage of the heart's action in the national organism of all the nations at war, with profound reaction on all others-such would be the consequences of a general conflagration in the present conditions of European civilization.' Similar views are expressed by

Paul Leroy-Beaulieu, one of the leadng economists of France. He thinks however, that France would suffer less than other great powers because, being self-supporting, she always has at her disposal an immense accumulation of agricultural products of the previous year on which to draw for a long period. German would have the greatest difficulty in obtaining imports, being cut off by the English fleets on the one hand and by Russia on the other.

TOUCH OF COUNTRY IN CITY
