INTEREST COMPOUNDED in its Savings Department every SIX MONTHS.

The most certain and sound method of accumulating money is by a COMPOUND INTEREST ACCOUNT. The large profits accruing therefrom, with additions made thereto every SIX MONTHS, make the way easy and satisfactory. In order to secure the best results, it is necessary to set aside weekly or monthly a definite sum from your income and deposit it to your account. To continue this from year to year will require a firm resolution and a little self denial, but the results will more than justify the sacrifice made.

This bank is under the rigid examination and scrutiny of the United States Government.

## HIS APPRECIATION

THE BUSINESS man thoroughly appreciates his checking account. It is indeed a business necessity; and he who tries to get along without one is at great disadvantage.

It is not required that a person should have a large bulk of business in order to open an account. Professional men, farmers, and even many women, are running checking accounts. If you have never done business in this way, and are not familiar with the plan, come to us and we will get you started. We are always glad to explain the workings of a checking account to those who are not familiar with them.

## Build a Home in 1913 and Rejoice

Every anniversary thereafter, like a lot of your friends who gave up the chase for elusive riches long ago and started to build their fortunes in the good old substantial way of our Pilgrim Fathers. Remember "A rolling stone gathers no moss" and nothing will keep a family from rolling quicker than a comfortable home. It gives the husband, wife and children something to work for and once you get such union of action from the whole family, success is bound to crown your efforts. We've been preparing for a lot of home building here this year and have a stock of lumber that outclasses in quality even that which your grandfather used when he built his home sixty years ago, and you know that's a "going some." Come in and see it.
